

Our kids are our passion.™

For Immediate Release: Freedom Designs, Inc. Simi Valley California USA February 1, 2012. For over 30 years, Freedom Designs, Inc. has paved the way for innovation in the manufacturing of customized seating and mobility systems for kids. Our introduction of the NXT “Generation Next” folding and rigid frame tilt-in-space wheelchair in February of 2011 has been very well received. Thank you all very much for your contributions to its success. Part of the success of a new product like the NXT is the planned retirement of the product it was designed to replace. For Freedom Designs that product is the Gizmo tilt-in-space wheelchair.

Effective February 1, 2012, Freedom Designs, Inc. will no longer accept any new quotes for Gizmo wheelchair products. The Gizmo will be discontinued. We will continue to receive quotes and place orders through January 31, 2012.

Effective February 1, 2012 all existing quotes and pending orders will be honored for 60 days and effective April 1, 2012, the Gizmo will not be manufactured. Of course, we will continue to provide replacement parts and accessories for Gizmo frames that are in service for a period of 5 years.

The Gizmo had a nice long run and for that we at Freedom Designs thank you very much. However, we believe (and you have shown us) that the NXT is a superior product in every way. It is much lighter. It is simple to grow and designed for kids and the people that help them use it. The reviews are positive and for those of you that have not already embraced the NXT, we hope you give it a look. You’ll be glad you did.

Thanks for your continued support.

The Freedom Team
